*It's fully responsive!  
Adjust the browser width to see it.*

Anima converts Figma into code!  
You can turn this template into HTML and publish a live website in 5 minutes.

- [Install & Run Anima plugin \(link\)](#)
- Select a frame
- Click 'Preview' to see a fast preview in HTML
- Click 'Get Code' to export HTML, or 'Sync' to update the live project
- You may also connect a domain directly to Anima [\(link\)](#)

**Features highlights**  
Here are some superpowers you can get when building with Figma + Anima

- Breakpoints & Responsiveness  
Use Breakpoints together with Auto-layout, so when opening from mobile or desktop, users will always get to the right view.
- Videos  
Create a rectangle & use Anima plugin to add video/GIF/Lottie  
These will play on "Preview in Browser"
- Embed anything  
Google maps, Analytics pixels, HubSpot forms, and any code in HTML/JSCSS.
- Multiple options to publish a live website:
  - Get a public link: Sync → Share → Public link
  - Connect a domain: Project page → Settings → Public link
  - Export HTML/React/Vue code: Plugin → "Get code" tab
